

To

Mr Santosh Degavat,

Evergreen Engineering technologies, Pune,

I, on behalf of **Arvind limited (Telecom division)**, Pune, would like to appreciate your services of supplying 3D models of our plastic product which we use to manufacture injection

Moulds. Generally, our product designs are much complicated and require very precise modelling. Also these product design cycles are time bound and requires timely completion

of projects. The Evergreen engineering have always delivered their services technically

competent with accuracy & time. We also appreciate their understanding of project &

suggestions given by them while on job.

We would like to recommend M/S Evergreen engineering technologies for their professional services of design & drafting.

The team is headed by Mr Santosh who is technically competent & a soft communicator.

Sincerely

Kishor Phalke,

Mechanical design consultant
